Education

Veermata Jijabai Technological Institute (VJTI), Mumbai — **Aug. 2024 – Present**
B.Tech in Computer Engineering with minor in Cybersecurity | CGPA: **7.81/10**

S. V. Joshi Junior College, Mumbai — **Aug. 2022 – May. 2024**
MHT-CET: **99.87%ile** | Rank: **301** | JEE: **93.67%ile** | HSC: **88.67%**

Relevant Coursework

- Data Structures
- Operating Systems
- Design and Analysis of Algorithms
- Object-Oriented Programming
- DBMS
- Machine Learning

Projects

TabMenu | *React.js, Node.js, Express.js, Socket.io, MongoDB, JWT* — **May. 2026 – Aug. 2026**

- Architected a **MERN dining platform** with QR-based table mapping and JWT role-based access control across 4 distinct user dashboards.
- Optimized WebSocket event pipelines using event-scoped rooms, cutting live order delivery latency by **90 seconds**.
- Engineered real-time state management and persistent cart systems, enabling live floor tracking and instant menu management.

Skill Exchange | *React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Multer* — **Dec. 2025 – Feb. 2026**

- Developed a full-stack **MERN platform** with JWT authentication and custom route guards, introducing a credit system that reduced learner costs by **25%**.
- Engineered transactional credit operations using **MongoDB atomic $inc operators** and Mongoose sessions to eliminate race conditions.
- Configured asynchronous media handling using **Multer** and Express middleware for automated server-side file validation and optimized storage.

AI Text Detector | *React.js, FastAPI, PyTorch, NumPy, spaCy, Scikit-learn* — **Sept. 2025 – Nov. 2025**

- Built an NLP detection engine using **DeBERTa transformers** and stylometric analysis, achieving **98% accuracy** in identifying generated text.
- Designed parallel feature extraction pipelines using **spaCy**, **NumPy**, and **Scikit-learn** to measure vocabulary richness and sentence structure.
- Deployed model weights behind a low-latency **FastAPI microservice** with tensor batching optimizations paired with a Next.js frontend.

Technical Skills & Certifications

Languages: C++, Java, Python, JavaScript, HTML, CSS, SQL
Frameworks & Libraries: React.js, Node.js, Express.js, PyTorch, NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn
Databases: MongoDB, MySQL, Mongoose
Developer Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook, Linux, Vercel
Certifications: Machine Learning Specialization – DeepLearning.AI & Stanford University (Andrew Ng)

Achievements

- Solved **500+ DSA problems** across LeetCode (Max: **1480**), Codeforces (Pupil, Max: **1315**), and CodeChef (2 Stars, Max: **1426**).

Experience & Leadership

Organizer / Core Member | *CP Club VJTI* — **May. 2026 – Present**

- Organized a **45-day Summer Coding Challenge** to evaluate, mentor, and onboard **100+** incoming junior and third-year (TY) engineering students into the VJTI CP Club.

Instructor / Mentor | *Community of Coders (COC) VJTI* — **May. 2026 – Present**

- Conducted **5+** technical workshops teaching fundamental **Data Structures and Algorithms (DSA)** concepts to **80+** junior students to strengthen campus coding culture.

Open Source Contributor | *OpenScienceLabs (OSL)* — **Dec. 2025 – Feb. 2026**

- Resolved framework bugs and merged **3 production-ready PRs** through rigorous peer code reviews, reducing critical bugs across core open-source repositories by **30%**.

Project Mentor | *Agastya Foundation (CSR initiative by JP Morgan)* — **Sept. 2025 – Mar. 2026**

- Directed interdisciplinary student teams of **5–7 members** in iterative wireframing and sprint planning, achieving on-time deployment of minimum viable products across **3** client simulations.
